

1999 Session of the Indiana General Assembly

State budget provides tax cuts, funding for education

The new state budget will make a very real difference in the lives of many Hoosiers. Some of the highlights include:

Program Funding

- Public education: Statewide total formula funding increase of an average of 4.7 percent in calendar years 2000 and 2001, with minimum guarantees of funding increases of at least 2.5%. Funding was increased for both at-risk and academic honors programs. Local schools and libraries also received \$76 million in technology funding.

- CHOICE: \$5 million increase per year in funding for home health care for the elderly

- Higher Education: appropriations were increased by 7.0 percent in fiscal year 2000 and 4.7 percent in 2001

- Vocational education: incentives for school corporations to provide programs in which high employment demand exists

Rep. Weinzapfel with Governor Frank O'Bannon

- A new \$50 million 21st Century Research and Technology Fund that will promote high-tech industries located in Indiana

- Social Services: Funding for the seriously mentally ill is increased by \$3 million in 2000 and \$6 million in 2001. MRDD programs will receive an additional \$9 million in funding.

Hoosiers will save \$672 million over next two years in tax cuts

- Homeowners: a new income tax deduction for property taxes up to \$2500

- Senior citizens: an increase in the income tax deduction from \$1000 to \$1500 and an increase in the property tax deduction for seniors from \$1000 to \$2000

- Small Businesses and Farmers: property tax "add-back" repealed so farmers and business owners can deduct the amount of their property taxes from their state income taxes

- Dependent children: an increase in the income tax deduction from \$1000 to \$2500

- Elimination of inventory tax for 87 percent of farms and businesses

- Elimination of county welfare fund and county welfare administration funds from local property taxes

- Renters: increased the income tax deduction from \$1500 to \$2000

Additional \$200 million approved for Indiana roads

I was pleased we appropriated an additional \$200 million from the state general fund for local roads over the next two years. This is in addition to the regular funding from gas taxes.

The amounts listed for each city are in addition to the total for the county. The amount appropriated to each city is based on the city's population.

Vanderburgh County	\$1.9 million
Evansville	\$3.8 million

Weinzapfel authors child labor reform bill

I was very pleased that legislation I authored to enact the first major reforms in Indiana child labor law in a decade has been signed by the Governor.

The legislation will require employers to have parental consent in order to allow 16- and 17-year olds to work more than 30 hours a week during the school year.

The legislation also clarifies state statutes covering how late 17-year olds can work in evenings during the school year. These teenagers will not be allowed to work later than 10 p.m. on school nights without receiving written permission from their parents.

Fines will be significantly increased for employers who violate the law. Money collected from these fines will be used to hire additional child labor inspectors and educate employers and teenagers about child labor laws.

With the changes incorporated in this bill, we hope to strike a balance between the desire of teenagers to pursue a job and make money with

Rep. Weinzapfel speaks in a committee meeting.

the need for them to maintain excellence in the classroom and make themselves more attractive to future employers.

The need for changing child labor laws has become more apparent as the numbers of young people who wish to find a job continues to rise. In 1999 alone, it is expected that up to 135,000 teenagers are expected to apply for a work permit.

Department of Health will examine cancer rate

The Indiana State Department of Health has agreed to examine the seemingly high cancer rates in southwestern Indiana.

I asked the commissioner of the health department in early April to consider the study and I am pleased he is acting quickly on the matter.

There has been growing concern in our area about deaths from cancer, whether the risk of obtaining cancer is greater than other areas of the state or nation, and possible environmental concerns or lifestyle choices which may contribute to an allegedly high cancer rate. I believe people need as much information as possible so that they can make the best possible decisions for them and their families.

While cancer rates are falling everywhere, the rates for southwestern Indiana appear to remain alarmingly higher than those in other areas. I am interested in determining whether this is true and then eventually examining possible reasons and explanations.

The department of health will provide assistance in obtaining detailed, historical data on cancer rates in Gibson, Posey, Vanderburgh and Warrick counties. The study will focus on 1960 to the present.

I am eager to learn the initial results and I will keep you informed in future newsletters about the progress of the studies.

Legislature passes variety of education issues

ISTEP Gateway Examination -- House Enrolled Act 1050 allows students who do not pass the ISTEP Gateway Examination to graduate, provided they meet certain other requirements. The legislation also provides that the case conference committee determines eligibility for graduation of certain students with disabilities. The Act also provides that all students in Grade 10 must take the examination.

Educational Standards -- A roundtable has been created to develop education standards for Indiana students. The legislation will set standards for each grade level, easily comparable to national and international standards, written in an easy-to-understand manner, and distributed to students and parents.

Postsecondary Proprietary Education Grants -- Combines the higher education award program for students at postsecondary proprietary educational institutions with the award program for students at other institutions of higher learning.
